## FULL-STACK DEVELOPER

---

Software developer who is passionate about the software he writes, and systems he architects. A personal advocate for keeping code testable, and actually tested.

Kyler has professional experience with full-stack development, leading teams, and utilizing the Scrum framework.

## EXPERIENCE

---

### Software Developer Internship

May 2023 - Aug 2023

Auto-Owners Insurance

Grand Rapids, MI

- Developed full-stack applications aimed at alleviating the burden of labor-intensive maintenance tasks performed by agents.
- Following my work's implementation, agents realized significant time savings, allowing them to allocate more time to acquiring new business.
- Adhered to the Scrum framework while collaborating with a team of business analysts, quality assurance engineers, architects, and other software developers.
- Personally responsible for front-end and back-end architectural decisions, as well as their implementation. Primarily utilized React.js, TypeScript, Node.js, Jest and SQL Server.

### Information Technology Internship

May 2022 - Apr 2023

Haworth

Holland, MI

- Collaborated with members of the Information Security team to roll out new security software to over 7,000 devices.
- Employed tools like Microsoft Endpoint and Configuration Manager to efficiently deploy application fixes and collect various hardware and software metrics.
- Implemented solutions streamlining IT Administrators' tasks, one allowing clients to set their own desktop background, saving developer time and improving client experience.

## PERSONAL PROJECTS

---

### kylerbomhof.com

July 2023 - Present

- A custom mobile-centric website that highlights my skills, experience, and projects.
- Built with cutting-edge rendering technologies, such as React server components, to decrease the initial page load and bundle size. Directly contributing to a more inclusive and improved user-experience.
- Developed using Next.js, styled with Tailwind CSS and DaisyUI, protected with reCAPTCHA. Currently hosted on Vercel.

### typetest-cli

June 2023 - Present

- A lightweight type speed tester for the terminal, written in Python.
- Published publicly on PyPI and easily installable using pip on any machine capable of running Python.

## EDUCATION

---

### Michigan Technological University

Aug 2020 - Dec 2023

Bachelor of Science - B.Sc, Computer Science

- 3.65 GPA
- It Oxygen Team Lead. Using machine learning to categorize enterprise data, allowing the client to determine manufacturing faults before they reach the market, saving thousands in potential recall costs.
- University Innovation Fellows member. Following Agile methodologies while making campus a better place.

## TECHNICAL SKILLS

---

**Languages:** Python, Golang, TypeScript, JavaScript, Node.js, Bash, C, C++, Ruby, Java, Lua, PowerShell

**Web Development:** React.js, Express.js, Next.js, Vite, Tailwind CSS, HTML5, CSS/SCSS, Material UI, DaisyUI

**CI/CD:** Jenkins, Docker, GitHub Actions, Vercel, AWS

**Data Management/Data Services:** SQL, MySQL/MariaDB, SQL Server, REST, OpenAPI

**Testing:** pytest, Jest, Cypress, Selenium

**System/Development Tools:** Linux, Vim, tmux, Bash Scripting, AWK

**Version Control/Project Management:** Git, GitHub, Bitbucket, Jira, Scrum, Agile methodologies
